4 November 2021

Dear Lee,

Re: Energy supply to existing homes

Thank you for your letter of 3 November (Ref. LW/11781/21), regarding Building Regulations and energy supply in new homes, following queries raised with me by St Fagans Community Council.

I have additionally been contacted by Radyr & Morganstown Community Council with similar queries. I have shared your letter with them, but they have an additional question regarding Welsh Government policy to make existing homes more energy efficient:

"What the Welsh Government believes should be done to make existing homes as well insulated and energy efficient as possible - and what support is available to homeowners wishing to achieve this?"

Could you please respond to this question with information which I could share with the Community Council?

With thanks,

Yours sincerely,

Mark Drakeford
